

GEN AI TASK

Ideogram:

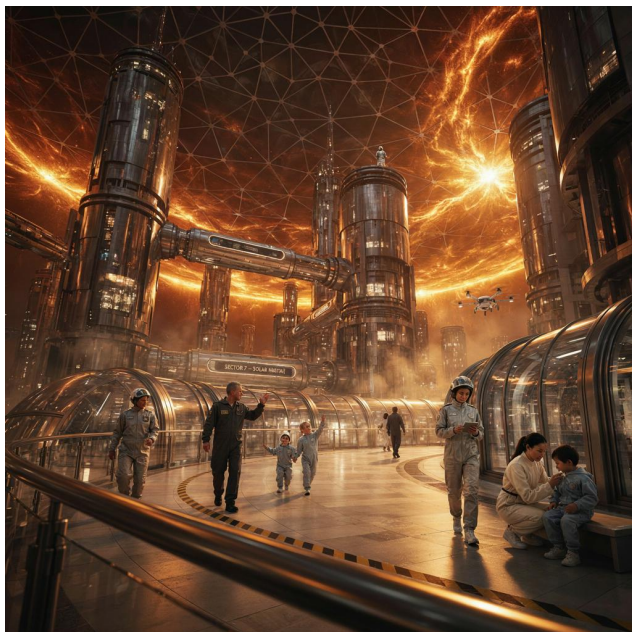

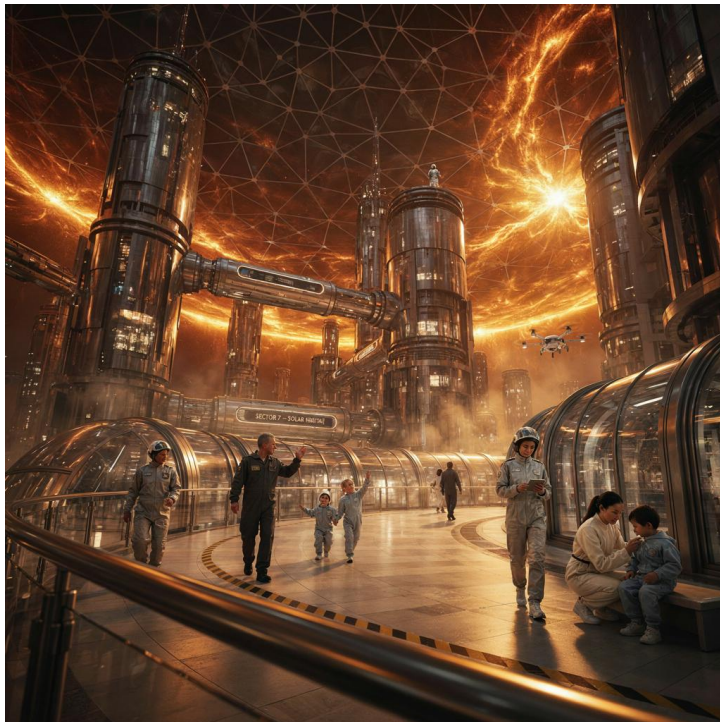

Prompt: A realistic miniature civilization living inside a giant hourglass, with a beautiful city built around the flowing golden sand.

Prompt:

Create an ultra-realistic cinematic scene of a futuristic human civilization living on the surface of the Sun. Show realistic people walking, working, talking, and living their everyday lives in a specially engineered city built to survive the extreme solar environment. Massive futuristic structures made

from heat-resistant materials stand above the glowing solar surface, with transparent protective domes, advanced transportation systems, homes, gardens, and public spaces. The Sun should look scientifically realistic and incredibly detailed, with enormous glowing orange and yellow plasma waves, solar flares, fiery convection patterns, and intense light surrounding the city. People should look completely realistic, wearing advanced heat-protective futuristic clothing and equipment, naturally interacting with each other as if this is their normal home. Show families and children safely playing in a protected futuristic recreational area while adults go about their daily lives. The atmosphere should feel peaceful, hopeful, and surprisingly normal despite the extreme environment. Photorealistic humans, realistic skin textures, natural body proportions, cinematic lighting, extremely detailed architecture, realistic reflections, volumetric light, dramatic scale, 8K photorealism, high dynamic range, realistic physics, cinematic wide-angle composition. Make it feel like a real photograph from a future civilization—not a cartoon, illustration, anime, or fantasy artwork.

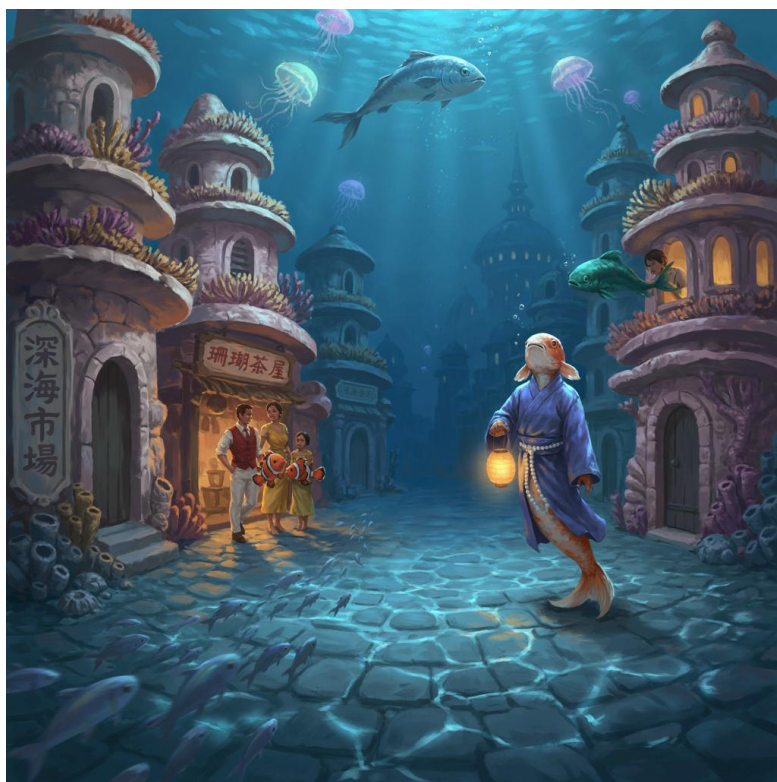

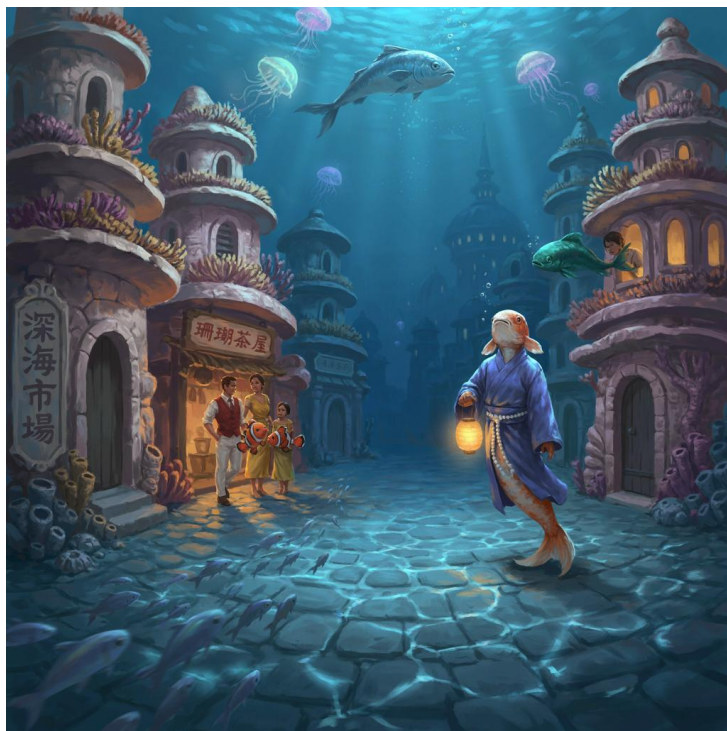

Prompt:

i want to generate an image like its an chocolate icecream world people living in the world like how normally they live in earth but happily y childrens playing ok give me

Prompt:i want to generate an image like living in underworld the fished as humans and humans as fishes sea animals ok give me one wonderful world under world

OpenArt AI:

Prompt: A photorealistic post-apocalyptic city in ruins, burning skyscrapers, destroyed cars, thick smoke, and terrified people desperately escaping through the streets.

Dark cinematic atmosphere, realistic fire and destruction, dramatic lighting, intense detail, disaster movie realism, 8K photography.

Meshy Ai:

Propmt: A cinematic historical scene set during the *1971 Indo-Pakistani War*, South Asia in December 1971, showing the tense military atmosphere around the Bay of Bengal. In the foreground, Indian Army soldiers in authentic 1971-era uniforms move cautiously through a muddy battlefield carrying period-accurate rifles, with Indian military trucks and tanks positioned behind them. In the distant sky, Indian Air Force aircraft fly through
